

FURON[®]
Pure Performance

Furon[®] UPX Valve

Manually Actuated 2-Way Multi Turn Valve (1/4", 1/2" & 3/4" Orifice)

Description

Furon UPX Valves are specifically designed for safe and reliable transfer of highly aggressive chemicals, including concentrated HF and HCl. UPX Valves are specifically designed for safe and reliable transfer of highly aggressive chemicals, including concentrated HF and HCl. Our proprietary technology protects the valve's working components from degradation due to chemical attacks. The wetted flow path constructed from 100% virgin PFA, assuring compliance with the highest purity standards. Additionally, the UPX Valves are capable of handling a wide variety of abrasive slurries and have a long track record of success in slurry applications.

Furon UPX Valves offer a 24 month factory warranty

Applications

Furon[®] UPX Valves are ideal for use in the semiconductor industry, or other applications requiring ultra-high purity and/or superior chemical resistance.

- Designed for use in ultrapure deionized water and aggressive chemical applications
- Suitable for use in abrasive slurry
- Compatible with concentrated HF and HCl
- Market applications include Semiconductor, Flat Panel, Photovoltaic, and Chemical Processing

Features and Benefits

- Superior life expectancy over competitive valves
- Suitable for use in all chemicals, including concentrated HF and HCl
- Suitable for use in abrasive slurries
- 100% virgin PTFE/PFA flow path
- Double diaphragm containment with standard leak detection port
- No exposed metallics
- Integral swivel base for freedom and ease of mounting
- Furon UPX Valve designs have been tested for more than 3 millions cycles

HCl more than 2.1 million cycles
HF more than 1.1 million cycles

Standard Options

- PFA Flare nuts (add -3)
- Other end connection types available. [Please consult factory](#) for:
 - FNPT
 - Sanitary Flange
 - Tube End
 - Others not listed
- Alternative flow patterns ([please consult factory](#) >>)
- High Temperature version is available ([please consult factory](#) >>)

Operating Specifications

Operating Pressure	100 psig (6.9 bar) at room temperature
Back Pressure	100 psig (6.9 bar) at room temperature
Flow	C _v 0.8 (1/4"), C _v 3.2 (1/2"), C _v 7.0 (3/4")
Max Operating Temperature*	230°F (110°C)**
Body	PFA
Diaphragm	Modified PTFE
Top Cap	ETFE

* [Please consult factory](#) for higher temperature >>

**It's recommended to use a FuseBond™ or Nippon Pillar connection over flare fitting for high temperature application
